

# MATERIAL YARD

51 E 120th St, Grant, MI 49327

(231) 834-3444

## RECYCLED ASPHALT

Produced from milling down hard surface asphalt driveways, this material binds together really well and is a dark color option.

A

## CRUSHED CONCRETE

Also a crushed material from recycled concrete, this locks together nicely

B

## DOLOMITE

Crushed limestone. This is a time tested driveway, aggregate material. Locks together extremely well and gives a nice light colored finish

C

## 22A SLAG

This is a by-product of metal that is crushed to a sized specification locks together for a solid driveway aggregate

D

## CRUSHED STONE

This material is a hybrid road gravel. It has a much higher stone mix than standard road gravel. The stone, clay, sand mix makes for a great driveway material

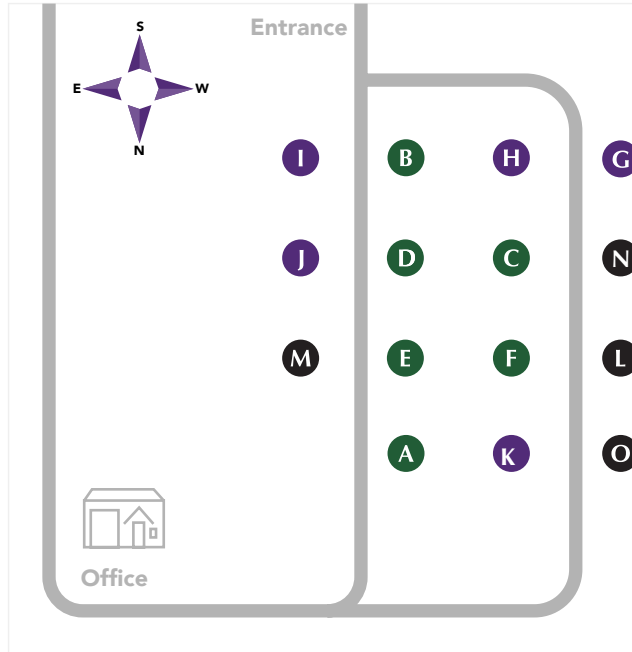

E

## 23A ROAD GRAVEL

23A Spec Road Gravel. Makes for a good base driveway material

F

## ◆ DRIVEWAY MATERIALS:

## ◆ STONES

## ◆ SAND & TOPSOIL

## OVERSIZED FIELD STONE

Great for landscape projects, waterways, and much more

G

## 1'-2" LANDSCAPE STONE

This is a great material to spruce up the landscaping around your house

H

## 1" WASHED STONE

Drainfield stone and is also used for landscaping projects

I

## 3/8" PEA STONE

Good for drainage projects and basements

J

## 1'-3' NUGGETS

This a good material to build up soft spots in drives or to slow water in waterways.

K

## SCREENED FILL SAND

Screened so all major stones are out of the material, small course stones are mixed in, creating a great drainfield sand or fill sand

L

## WASHED MORTAR SAND

Our washed Mortar Sand is screened very fine for a smooth beach like sand

M

## SCREENED TOPSOIL

The goal for our topsoil is to be easy to work with and a great base for your lawn to grow.

N

## COMPOSTED MANURE

Our compost has been lab tested giving your seedlings, grass, and other plants a jump start in growth!
